Your handwriting reveals a lot more about your personality than you might think. In fact, there is a science known as Graphology, which involves studying and analyzing handwriting for personality traits. Graphology has been around for centuries, with the first known public book emerging in 1622. The word, however, was only coined in the 1870s ...

[Trump's Handwriting Analyzed By Expert in 1988](#)

The art of reading handwriting is called graphology. The logic is pretty simple. Handwriting is nothing but an output of the electrical impulses of the brain. Since it is an output, one can gauge the person/individual from the handwriting. Now, why focus on the signature? In an ever-increasingly electronic world, you just don't write that often.
